London Mail No. 92

Reference N/22668/189

October 26th, 1944.

Your No. 4204.

We are reproducing the original reports (both odd and even) and supplying copies to the 48-landers here, to A.F.H.Q. and to K.13's own people and to our own Service sections.

As far as we are concerned, we require you only to telegraph high spots of operational importance, for example, direct identification of units, any large scale moves of units or materials etc. Defences can be left for the beg, and for us to deal with in the Italian original. Therefore no need for you to translate and edit at your end. Mark on original items which have been telegraphed.

We suggest 189's office could do the same. Let them know that the originals of both odd and even reports are reaching us and are being passed by us to their office here.

The odd and even arrangement is satisfactory and there is no need for you to telegraph "high spots" from the "odd" numbered reports.
